Subject: HOTSITE REPORT: Update - Freedom Industries, Charleston, WV

Vicky Binetti of Region 3's Water Program reported that the WV Bureau of Public Health, the lead for the residential drinking water study, continues to develop the details for the study. The Bureau has taken comments from EPA and will now work with outside parties to design the study. It is our understanding that outside parties will implement the study.

OSC Dennis Matlock reported that a crew remains on-site to oversee water pumping operations. The facility continues to inspect and maintain the boom in the Elk River. Due to continued inclement weather, the facility secured areas of the site with unsafe conditions to ensure worker safety. WVDEP continues 24-hour oversight of operations.
